About the Conference:

The Economy for the Common Good (ECG) movement started in 2010 with the publication of the first edition of the book "Gemeinwohl-Ökonomie" (Economy for the Common Good) by Christian Felber and the presentation of a first version of the common good balance sheet by a group of Austrian entrepreneurs. More than 2,000 companies, mainly small and medium-sized enterprises (SMEs), have since then been registered as supporters and more than 500 companies have already prepared or are currently preparing an ECG balance sheet. The movement spread from the German-speaking countries to other countries, especially in Europe and Latin America.

The ECG can be considered as a new approach in-line with several socio-economic and political approaches that aim to frame economic activity within ecological and social boundaries. But different to other approaches, the ECG does not aim to incorporate sustainability into the predominant rationale of profit-maximization but to embed economic activities into a broader cultural and social context and to link them with the core human values of dignity, solidarity, social justice, environmental sustainability, democracy and transparency. Recently, a growing number of scholarly works focussed on the ECG both from conceptual and empirical perspectives.

The conference aims at bringing together those scholars working on topics related to the ECG or similar concepts. It will provide a platform for a critical review, a resonance space, and a platform for networking. We also strongly encourage submissions from early career researchers, Master and PhD students.

Conference Topics:

We welcome contributions from any discipline, industry, or organization in the private, public, or non-profit sectors. ECGPW-2019 invites research submissions, conceptual, empirical, experimental, and case studies by nature, on the following topics:

Paper Submission and Review Procedure:

You are invited to submit either an abstract or a complete paper which will be peer reviewed. Please include academic title(s) (such as Dr), the name of author(s) and affiliation of the corresponding author and email address in the paper itself.

- All Abstracts must be submitted in English (please contact us in case your contribution will only be in German)
- Abstracts should not exceed 200 words.
- The abstract should clearly state the:
 - Author(s) & Affiliation(s)
 - Contact E-Mail
 - Title
 - Principal Topic
 - Method (or “Key Propositions” for conceptual papers)
 - List of Keywords
- Results and Implications
- Abstracts must be text only and there is no need to list the references even if in-text references are used. Pictures or graphs should not be submitted.
- Paper should not exceed 7,500 words, including all tables, figures, notes, and references.
